

FLOOD SITUATION UPDATE

Supaul river corridor | Initial field planning note

Area	Supaul district, Bihar
Reference period	12 August 2023 to 28 August 2023
Current status	Initial evidence review pending
Operational need	Prioritise locations for field verification

Situation summary

Field teams are preparing to assess reported changes along the Kosi river corridor. The available material includes two satellite scene previews from different dates, but the affected locations have not yet been verified on the ground.

Decision required

Identify the locations that should be checked first, with particular attention to road crossings, embankments, low-lying settlements and agricultural parcels near the river.

Available material

01	Prepared optical scene preview dated 12 August 2023.
02	Prepared optical scene preview dated 28 August 2023.
03	A selected river corridor for focused review.
04	Field observations to be added after local verification.

Working note

The imagery should support the field decision, not replace local confirmation.
